

Monday's maths sheet. Someone in the first mock exam of this set asked me to do a maths sheet for them on time, but I (fittingly?) failed to do so in a timely manner, and also forgot who it was. So, with double-apologies to that person, here it is: a temporal selection of questions for you. Draw the clock hands to show the passage of time. Love from Rachel :)

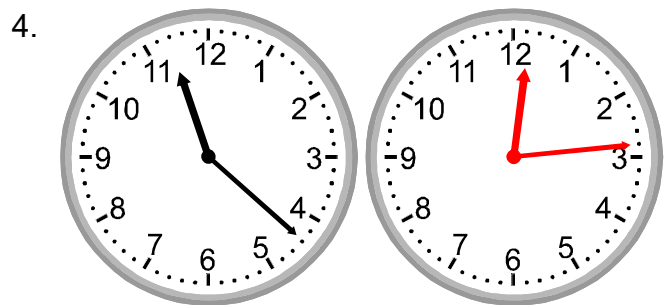

What time will it be in 38 minutes?

What time will it be in 2 hours 10 minutes?

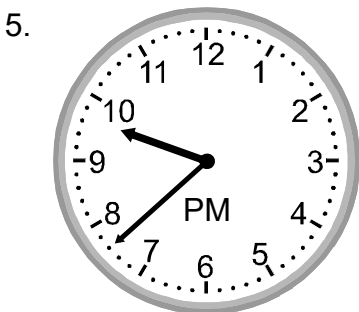

What time will it be in 1 hour 40 minutes?

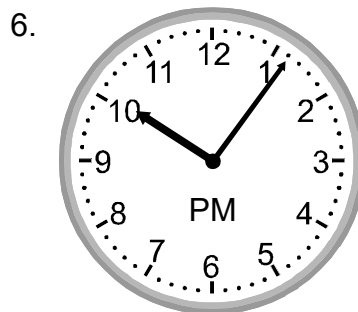

What time will it be in 51 minutes?

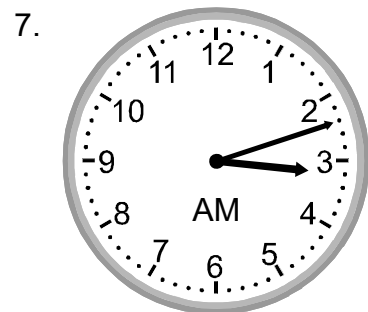

Write down the time for each clock.

21:38

22:06

03:12

"Convert the given amounts of time to alternate measures of the same amount of time." (are you panicking??? Don't, this is basically just multiplying- you know there are sixty minutes in an hour, so do 60×13 to work out the first question). Peace out! Rachel x

8. 13 hr = 780 min min 9. 38 min = 2,280 sec sec

10. 49 min = 2,940 sec sec 11. 63 hr = 3,780 min min

12. 17 hr = 1,020 min min 13. 92 min = 5,520 sec sec
