

Name

Here is the daily maths sheet experiment.

Please can you print this sheet and use it to record you daily maths score.

Anyone can do this, if Granny is prepared to do it too, let her join in: the more the merrier!

Use a calculator to work out **Column A** divided by **Column B**

If you miss a day don't worry but make sure that you get the correct date for each sheet

When we have done send it to me.

Don't worry if your scores aren't good, you'll only get better by trying, and you are trying

	<b>Column A</b> number of correct answers	<b>Column B</b> total number of questions	<b>Column A</b> divided by <b>Column B</b>
